Abstracts

Myopia and presbyopia are conditions of the eye which result in a difficulty in viewing objects clearly. Myopia is the condition in which people have a trouble seeing objects at a distance while presbyopia is the condition where people are unable to clearly see the objects kept close to their eyes. Both these conditions are caused when the light entering the eye does not properly focus on the retina, leading to near sightedness in case of myopia. Presbyopia generally occurs among old people and is caused as a result of weakened muscles in the eye.

According to QYResearch's new survey, global Myopia and Presbyopia Treatment market is projected to reach US\$ 28630 million in 2029, increasing from US\$ 16350 million in 2022, with the CAGR of 8.3% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Myopia and Presbyopia Treatment market research.

The Myopia and Presbyopia Treatment market is driven by the increasing prevalence of these vision disorders, especially due to lifestyle changes and prolonged use of digital devices. With myopia affecting a significant portion of the global population, there's a growing demand for effective treatment options to manage and correct this condition. Additionally, the aging population contributes to the demand for presbyopia treatment solutions. Technological advancements in ophthalmic devices and surgical procedures have introduced innovative treatments, such as LASIK, orthokeratology, and intraocular lenses, which offer improved visual outcomes. However, challenges include ensuring the safety and efficacy of these treatments, addressing potential side effects, and making these options accessible and affordable to a wider range of patients. Meeting these challenges and providing reliable, patient-friendly solutions will be essential for

driving growth in the myopia and presbyopia treatment market.
