Abstracts

This report studies the global N-Acetyl-L-Methionine market status and forecast, categorizes the global N-Acetyl-L-Methionine market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa). N-Acetyl-L-methionine is a modified amino acid. It's a kind of fine chemical intermediate. It is widely used in chemical industry and other fields. N-acetyl-L-methionine is nutritionally and metabolically equal to L-methionine.

As international economic situation is complicated, in the next few years there will be many uncertainties although. There still many companies enter into N-Acetyl-L-Methionine industry due to the government' policy. The current demand for N-Acetyl-L-Methionine product is relatively low in the mature market, such as Europe and North America, but the demand in China is relatively lower due to the government' positive policy in food industry.

The global market is concentrated in Europe and North America. The Europe region accounts about 50% share of the global production, followed by USA.

Although sales of N-Acetyl-L-Methionine brought a lot of opportunities, the study group recommends the new entrants who just having money but without technical advantage and down-stream support, do not to enter into the N-Acetyl-L-Methionine field hastily.

The global N-Acetyl-L-Methionine market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
