## Abstracts

This report studies the global Non-Contact Temperature Sensors market status and forecast, categorizes the global Non-Contact Temperature Sensors market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Non-Contact Temperature Sensors, whose the sensing element does not contact with the measured object, is also called as non-contact thermometers. This type of sensors is used to measure the temperature of moving objects, small objects or objects whose temperature change rapidly. And also be used for measurement of temperature distribution. Non-contact (infrared) temperature sensing reads temperature by intercepting a portion of the infrared energy emitted by an object or substance, and detecting its intensity. Non-contact is used to sense the temperature of solids and liquids, but cannot be used on gases due to their transparent nature.

According to QYResearch, the global Non-Contact Temperature Sensors market will grow 14.81 percent to \$633.46 million in 2015.

Fluke captured the top one revenue share spots in the Non-Contact Temperature Sensors market in 2015. Fluke dominated with 19.13 percent revenue share, followed by Accurate Sensors with 10.97 percent revenue share and OMRON with 8.49 percent revenue share.

In the next five years, the global consumption of Non-Contact Temperature Sensors will show upward tendency further, consumption is expected in 2020 will be 57137 (k units). Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost are two major problems.

Although sales of Non-Contact Temperature Sensors brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology

and downstream channels, the research group did not recommend taking risk the enter this market.

The global Non-Contact Temperature Sensors market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
