Abstracts

A nursing bra is a specialized brassiere that provides additional support to women who are pregnant or lactating and permits comfortable breastfeeding without the need to remove the bra. This is accomplished by specially designed bra cups that include flaps which can be opened with one hand to expose the nipple. The flap is usually held closed with a simple clasp or hook.

The Nursing Bras industry concentration is not high; there are so many players in the world, and high-end products mainly from U.S. and Western European.

Global giant players mainly distributed in U.S. and E.U. The manufacturers in U.S. have a long history and unshakable status in this field. Manufacturers such as Bravado and Destination Maternity (Motherhood) have relative higher level of product's quality. As to Europe, Triumph has become as a global leader. In Germany, Anita leads the technology development. Most of Chinese manufactures locate in Jiangsu, Guangdong and Zhejiang province.

Many companies have several plants, usually locate in the place close to aimed consumption region.

The key consumption markets locate at developed and large new born population countries. China takes the market share of 25%, followed by Europe with 20.7%. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
