## Abstracts

This report studies the global Octreotide market status and forecast, categorizes the global Octreotide market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Octreotide is an octapeptide that mimics natural somatostatin pharmacologically?it is a more potent inhibitor of growth hormone, glucagon, and insulin than the natural hormone. Usually in the form of a salt of acetic acid.

The production of Octreotide mainly focuses on Europe, China and India. The Europe occupies the largest share and it about reach 66.36% in 2015. Novartis exports to other countries mainly in the form of finished drug.

The Octreotide product increased fast in the past five years, the production growth in the past two years. There have been new manufacturers to enter the field year by year. But for now, it is difficult to obtain certification.

It will expect that the production and the capacity will increase fast in the future, But with octreotide acetate in China continues to mature in manufacturing technology, in the future, trade of octreotide API will gradually decrease, more and more Octreotide will sold as finished medicine.

The global Octreotide market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
