An off-road vehicle is considered to be any type of vehicle which is capable of driving on and off paved or gravel surface. It is generally characterized by having large tires with deep, open treads, a flexible suspension, or even caterpillar tracks. Other vehicles that do not travel public streets or highways are generally termed off-highway vehicles, including tractors, forklifts, cranes, backhoes, bulldozers, and golf carts. Off Highway Vehicle Engine is the engine specifically designed for off road vehicle.

In the coming years there is an increasing demand for off-highway vehicle engine in the regions of North America and Europe that is expected to drive the market for more advanced off-highway vehicle engine. Growth in government budgets in the principal countries, increasing of construction fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on agricultural machinery, retrofitting and renovation of old technology, increasing adoption of off-highway vehicle engine will drive growth in North America and Europe markets.

Globally, the off-highway vehicle engine industry market is low concentrated as the manufacturing technology of off-highway vehicle engine is relatively matures than some high-tech equipment. And some enterprises, like Cummins, Caterpillar, MAN, etc. are well-known for the wonderful performance of their off-highway vehicle engine and related services. At the same time, North America, occupied about 27% revenue market share in 2016, is remarkable in the global off-highway vehicle engine industry because of their market share and technology status of off-highway vehicle engine.

The consumption volume of off-highway vehicle engine is related to downstream

industries and global economy. As there will always be some uncertainty in the global economy in the following years, the growth rate of off-highway vehicle engine industry may not keep that fast. But it is surely forecasted that the market of off-highway vehicle engine is still promising.

The global Off Highway Vehicle Engine market is valued at 11900 million US\$ in 2017 and will reach 14100 million US\$ by the end of 2025, growing at a CAGR of 2.5% during 2018-2025.
