Abstracts

The revenue of optical encoders increases from 1122.27 million \$ in 2012 to 1269 million \$ in 2016, with an average growth rate of more than 2.63%. In the world wide, North America, Europe and China are the major manufacturing regions. North America is the leader in optical encoders market, whose revenue is estimated to 39.88% production market share in 2016. Broadcom, BEI Sensors, Renishaw, Hengstler, Dynapar and Baumer Group are the global leading manufacturers of optical encoders. An optical encoder is a type of encoder that uses a sensor to identify position change as light passes through a patterned encoder wheel or disk.

For many years, optical encoders have been the traditional choice for motion control. Optical encoders use line-of-sight sensing to create signals. It works when a light source splits into two 90-degree out-of-phase beams that pass through transparent, evenly spaced windows in a rotating optical disk.

This report studies the Optical Encoders market status and outlook of global and major regions, from angles of manufacturers, regions, product types and end industries; this report analyzes the top manufacturers in global and major regions, and splits the Optical Encoders market by product type and applications/end industries.
