Dydrogesterone is a progestin medication, which used for a variety of indications, including threatened or recurrent miscarriage during pregnancy, dysfunctional bleeding, infertility due to luteal insufficiency, dysmenorrhea, endometriosis, secondary amenorrhea, irregular cycles, premenstrual syndrome, and as a component of menopausal hormone therapy.

According to QYResearch's new survey, global Oral Dydrogesterone market is projected to reach US\$ 1610.2 million in 2029, increasing from US\$ 1009 million in 2022, with the CAGR of 6.9% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Oral Dydrogesterone market research.

The Dydrogesterone Tablet market is driven by the increasing awareness of women's health issues and the demand for effective treatments for various gynecological conditions. Dydrogesterone tablets are widely prescribed for menstrual disorders, endometriosis, and assisted reproductive technologies. The rise in gynecological disorders and the need for therapies that balance hormonal fluctuations contribute to market growth, as women seek solutions that address their specific health concerns. Moreover, the benefits of dydrogesterone, such as its progestogenic properties with minimal androgenic effects, align with improved patient tolerability and outcomes. However, the market also faces challenges, including competition from alternative treatment options and potential side effects associated with hormone therapies. Additionally, addressing regulatory approvals and ensuring affordability for a wide range of patients can pose obstacles for manufacturers. To succeed, companies must focus on educating healthcare professionals and patients, conducting clinical studies to

demonstrate efficacy and safety, and addressing the challenges to meet the increasing demand for personalized and effective gynecological treatments in women's healthcare.
