Abstracts

This report studies the global Organic Peroxide market status and forecast, categorizes the global Organic Peroxide market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Organic peroxides are organic compounds containing the peroxide functional group (ROOR'). If the R' is hydrogen, the compounds are called organic hydroperoxides. Peresters have general structure RC(O)OOR. The O-O bond easily breaks, producing free radicals of the form RO•. Thus, organic peroxides are useful as initiators for some types of polymerisation, such as the epoxy resins used in glass-reinforced plastics. It is mainly used as polymerization initiator or crosslinking agents in the chemical and plastics industry. Degrading agent is another important application of organic peroxide. In 2016, initiator took 76.68% of total consumption share. Crosslinking agent and degrading agent each took 11.72% and 6.37% consumption. Other applications totally took 5.23% consumption share.

The global Organic Peroxide market is valued at 2520 million US\$ in 2017 and will reach 2690 million US\$ by the end of 2025, growing at a CAGR of 0.8% during 2018-2025.
