This report studies the global Outdoor Antenna market status and forecast, categorizes the global Outdoor Antenna market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

In radio, an antenna is the interface between radio waves propagating through space and electric currents moving in metal conductors, used with a transmitter or receiver. In transmission, a radio transmitter supplies an electric current to the antenna's terminals, and the antenna radiates the energy from the current as electromagnetic waves (radio waves). In reception, an antenna intercepts some of the power of an electromagnetic wave in order to produce an electric current at its terminals, that is applied to a receiver to be amplified. Antennas are essential components of all radio equipment, and are used in radio broadcasting, broadcast television, two-way radio, communications receivers, radar, cell phones, satellite communications and other devices.

Outdoor antennas are usually more powerful than indoor antennas so they are generally more reliable. Outdoor antennas that are Omni-directional, directional, high-gain, 2.4GHz and 5GHz that will help expand Wi-Fi network.

Directional antennas must point toward the transmission tower to receive the signal while multi-directional antennas can receive signals when not pointing toward the transmission tower. Non-directional antennas radiate unwanted radio waves in the environment, and conversely pick up noise from every direction. On the basis of rating system, the global market is classified into yellow, green, light green, red, and blue, purple.

Antenna webs rates outdoor antennas with a 6-color rating system. These ratings should appear on the outside of a CEA-approved product such as Yellow - small multi-directional, Green - medium multi-directional, Light green - large multi-directional or small multi-directional with pre-amp, Red - medium directional, Blue - medium

directional with pre-amp, and Purple - large directional with pre-amp. The colors are designed to help select an antenna without having to compare specifications between models.

The global Outdoor Antenna market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
