Abstracts

Outdoor Power Equipment is the outdoor power products used in the Lawns, Gardens, grasses, hedges, etc. Outdoor Power Equipment includes many kinds of machineries and tools. Lawn Mower, Chainsaws and Trimmers & Blowers are important machineries.

Technology, product design, and pricing patterns influence purchases of Outdoor Power Equipment of residential and commercial customers. The situation is rather complex, as the companies attempt to cater to diverse segments. In the residential sector, many individuals are not garden enthusiasts and simply wish to complete their yard chores quickly and easily. The zero-turn radius lawn mowers were successful, but robotic units had very limited acceptance. Commercial users keep their equipment operating many hours each day and favor 'creature friendly' or ergonomic features that reduce strain. In both sectors, customers are starting to favor equipment that can perform multiple tasks, such as mowing and mulching. Also, producers are planning to expand their offering of cordless electric units that are less noisy and more environment-friendly.
