Abstracts

A pacifier is an article with a nipple, intended for a young child to suck on, but that is not designed to help a baby obtain fluid. A pacifier usually has a guard or shield at the base of the nipple that keeps the pacifier from being sucked completely into a child's mouth. It also has a handle or ring, usually on the opposite side of the guard or shield from the nipple, which is used to hold or grasp the pacifier.

Most of the Pacifier companies adopt the marketing strategy of dealer sales supplemented with direct sales, which mainly comes from the characteristics of Pacifier industry. By introducing larger dealers, Pacifier manufacturers can not only enhance the capacity of the company's sales, but also comprehensively grasp the market changes through the feedback information collected by dealers. Because downstream demand is analyzed, the Pacifier manufactures can timely change management strategy, which is more conducive to increase of sales revenue.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Pacifier 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Pacifier 3900 industry.
