## Abstracts

A printed circuit board (PCB) mechanically supports and electrically connects electronic components using conductive tracks, pads and other features etched from copper sheets laminated onto a non-conductive substrate. Components – capacitors, resistors or active devices – are generally soldered on the PCB.

PCB & PCBA industry is highly fragmented, manufacturers are mostly in the Japan, Taiwan, South Korea, United States and China. Among them, China output volume accounted for more than 48.01% of the total output of global PCB & PCBA in 2017. Nippon Mektron is the world leading manufacturer in global PCB & PCBA market with the market share of 4.12%, in terms of revenue.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
