Abstracts

Paediatric radiology is one of the smallest radiology sub-specialties. Equipment and facilities suitable for children ranging from premature infants to adult sized teenagers are often different to those used for adults. Imaging needs to be child focussed and specific to the age of the child. Radiation protection and safeguarding are paramount concerns for this age group.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Pediatric Radiology Equipment market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Pediatric Radiology Equipment industry.

Based on our recent survey, we have several different scenarios about the Pediatric Radiology Equipment YoY growth rate for 2020. The probable scenario is expected to grow by a xx% in 2020 and the revenue will be xx in 2020 from US\$ xx million in 2019.
