Abstracts

Peripheral wires are used during percutaneous transluminal angioplasty (PTA) for guiding stents or balloon catheters to the site of blockage in the peripheral vasculature.

According to QYResearch's new survey, global Peripheral Wires market is projected to reach US\$ 1097.3 million in 2029, increasing from US\$ 799 million in 2022, with the CAGR of 4.7% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Peripheral Wires market research.

North America is the largest region of peripheral guidewire in the world in the past few years and it will keep increasing in the next few years. Japan, USA, EU, etc. are now the key developers of peripheral guidewire. There are a few small vendors developing peripheral guidewire in China, but their product quality is still questioned by the market.
