This report studies the global Permethrin market status and forecast, categorizes the global Permethrin market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Permethrin is an insecticide in the pyrethroid family. Pyrethroids are synthetic chemicals that act like natural extracts from the chrysanthemum flower. Permethrin is used in a number of ways to control insects.

Products containing permethrin may be used in Public Hygiene mosquito control programs. They may be used on food and feed crops, on ornamental lawns, on livestock and pets, in structures and buildings, and on clothing. Permethrin may also be used in places where food is handled, such as restaurants. Permethrin was first registered with the United States Environmental Protection Agency (U.S. EPA) in 1979, and was re-registered in 2006.

The permethrin industry concentration is relatively high; there are nine major manufacturers in the world, which are mainly distributed in China and India. China has sold about 1611 MT in 2016 and India sold 3352 MT at the same year. As for western countries, companies there usually import permethrin for the production of pesticides and insect repellent.

All manufacturers in the world are committed to the improvement of product.

International companies have been leading the R&D level in the past. These two years, some Chinese manufacturers can almost catch up with the world's leading technology. Global major consumption regions are distributed in China, North America, Europe, India and Japan etc. North America and Europe separately consumed about 13.50% and 14.14% of global total consumption in 2016. China consumed 1611 MT in 2016, accounting for a share of 17.89%. India, as the largest production and consumption

region, consumed about 3352 MT in 2016.

The global Permethrin market is valued at 180 million US\$ in 2017 and will reach 250 million US\$ by the end of 2025, growing at a CAGR of 5.0% during 2018-2025.
