Special Suggestion: We have contacted many industry companies and scientific institute during this project. And we got the information for sure that currently, the perovskite solar cells products are only or still in Research and Development process. Scientists and engineers are working hard every day to make the perovskite solar cells come into market earlier. Bur right now, this kind of solar cells are not in commercial production. There is no exception of this conclusion. We have consulted some engineers and they told us that about in 5 years or 10 years, there may be some breakthrough in the perovskite solar cells industry. But they are not sure about that. We will reflect these information in this report.
