Abstracts

Phosphate ester, is an ester derived from an alcohol and phosphoric acid. It can be also called as organophosphate because these molecules have a phosphate group bonded to carbon. Phosphate ester is widely used in pesticides, lubricants, surfactants, flame retardants.

Phosphate esters are produced by phosphorylation of (ethoxylated) aliphatic or aromatic alcohols. They are always used as anionic surfactants in various chemical products such as flame retardants, lubricants and cleaning products. In 2015, 19.30% of phosphate esters were used in the manufacturing of flame retardants, while 21.74% and 20.34% were respectively consumed in lubricants and cleaning products production.
