Abstracts

This report studies the global Phytases market status and forecast, categorizes the global Phytases market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, Asia-Pacific, South America, and Middle East & Africa.

This report studies the Phytases market, A phytase (myo-inositol hexakisphosphate phosphohydrolase) is any type of phosphatase enzyme that catalyzes the hydrolysis of phytic acid (myo-inositol hexakisphosphate) – an indigestible, organic form of phosphorus that is found in grains and oil seeds – and releases a usable form of inorganic phosphorus.

Currently, some companies in the world can produce Phytases product, mainly concentrating in Europe. The main market players are Novozymes, DuPont (Danisco), AB Enzymes, DSM, BASF, etc. The sales volume of Phytases increased from 114235 MT in 2012 to 152622 MT in 2016, with an average growth rate of 5.96%.

In consumption market, the growth rate of global consumption is smooth relatively. China and Europe are still the mainly consumption regions due to the advanced production technology and rapid development of economy.

The benefits of enzymes are becoming better realized as more research is done. For the animal, enzymes optimize gut health, produce uniform growth and enhance overall health. For the producer, they decrease feed costs and improve profitability.

The global Phytases market is valued at 380 million US\$ in 2017 and will reach 580 million US\$ by the end of 2025, growing at a CAGR of 5.7% during 2018-2025.
