## Abstracts

Plate Finned Heat Exchanger is a type of heat exchanger design that uses plates and finned chambers to transfer heat between fluids. It is often categorized as a compact heat exchanger to emphasise its relatively high heat transfer surface area to volume ratio. The plate-fin heat exchanger is widely used in many industries, including the aerospace industry for its compact size and lightweight properties, as well as in cryogenics where its ability to facilitate heat transfer with small temperature differences is utilized.

At present, the manufactures of Plate Finned Heat Exchanger are concentrated in China, Europe, US. China is the largest production area in the world, which occupied about 31.27% in 2015. The following areas are North America and Europe. The global leading players in this market are Linde Engineering, CHART, Five Cryo, Sumitomo Precision, Hongsheng, Hangyang and Yonghong.
