This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

An air blow gun consists of a nozzle, or tip, installed on a compressed air gun or line. On an air gun, the nozzle serves as a quick and efficient tool for light cleaning, drying and blowing off of parts or work areas. On an airline, it can be used to blow out parts or waste, or to dry out parts in an automated manufacturing process.

In the coming years there is an increasing demand for Air Guns in the regions of North America and Europe that is expected to drive the market for more advanced Air Guns. Increasing of industrial machinery expenditures, more-intense competition, launches in introducing new products, increasing of spending on automotive industry, retrofitting and renovation of old technology, increasing adoption of Air Guns will drive growth in United States and Europe markets.

Globally, the Air Guns industry market is low concentrated as the manufacturing technology of Air Guns is relatively matures than some high-tech equipment. And some enterprises, like West, Unilife, CeQur, etc. are well-known for the wonderful performance of their Air Guns and related services. At the same time, North America, occupied 28.01% sales market share in 2016, is remarkable in the global Air Guns industry because of their market share and technology status of Air Guns.

The product average price declined in the past few years due to the technology development, the average price will keep the trend in the few future years due to increasing mature manufacturing technology and lowering cost of raw materials.

The global Pneumatic Equipment market is valued at 310 million US\$ in 2017 and will

reach 340 million US\$ by the end of 2025, growing at a CAGR of 1.2% during 2018-2025.
