This report studies the global Polycarbonates market status and forecast, categorizes the global Polycarbonates market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Polycarbonates (PC) are a group of thermoplastic polymers containing carbonate groups in their chemical structures. Polycarbonates used in engineering are strong, tough materials, and some grades are optically transparent. They are easily worked, molded, and thermoformed. Because of these properties, polycarbonates find many applications. Polycarbonates do not have a unique resin identification code (RIC) and are identified as 'Other', 7 on the RIC list.

The main production areas are in Asia, Europe and North America while the main consumption areas also in those areas. Asia is the largest consumption and production areas.

We tend to believe that this industry still has a bright future, considering the current demand of downstream. Polycarbonates will be the mainstream Polycarbonates products. In the subsequent few years, Polycarbonate's market share will grow. In developing countries, Polycarbonates is still going to be a mainstream product. In developed countries, many companies are turning to the production of Polycarbonates and Polycarbonates.

The global Polycarbonates market is valued at 10400 million US\$ in 2017 and will reach 11300 million US\$ by the end of 2025, growing at a CAGR of 1.0% during 2018-2025.
