Abstracts

This report studies the global Polypropylene Glycol market status and forecast, categorizes the global Polypropylene Glycol market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Polypropylene glycol or polypropylene oxide is the polymer of propylene glycol. Chemically it is a polyether. The term polypropylene glycol or PPG is reserved for low to medium range molar mass polymer when the nature of the end-group, which is usually a hydroxyl group, still matters. The term 'oxide' is used for high molar mass polymer when end-groups no longer affect polymer properties.

The Polypropylene Glycol industry concentration is relatively high; the high-end products mainly from Japan and Western European.

The key consumption markets locate at developed countries. Japan takes the market share of 30.7% in 2016, followed by Europe with 26.7%.

We tend to believe this industry becomes more and more mature, and the consumption increasing rate will show a smooth curve.

The global Polypropylene Glycol market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
