Abstracts

Polypropylene (PP) is a versatile thermoplastic material, compatible with many processing techniques and used in many commercial applications.

According to methyl arrangement position, it has three types, isotactic polypropylene, atactic polypropylene and syndiotactic polypropylene. The first is most usual. It has many applications such as woven products, injection products, film, fiber, extruded products and etc. Woven products consumed most of polypropylene. In 2015, polypropylene used in the woven products took about 39.83% of global consumption. Raw materials of polypropylene are mainly crude oil and coal. All over the world, polypropylene manufacturers include LyondellBasell, SABIC, Braskem, Total, ExxonMobil, JPP, Prime Polymer, Reliance Industries, Formosa Plastics, Sinopec, CNPC and Shenhua. Those companies all have oil or coal business (mainly in China). Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Polypropylene 3900 market in 2020.
