This report studies the global Polypropylene market status and forecast, categorizes the global Polypropylene market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Polypropylene (PP) is a versatile thermoplastic material, compatible with many processing techniques and used in many commercial applications.

According to methyl arrangement position, it has three types, isotactic polypropylene, atactic polypropylene and syndiotactic polypropylene. The first is most usual. It has many applications such as woven products, injection products, film, fiber, extruded products and etc. Woven products consumed most of polypropylene. In 2015, polypropylene used in the woven products took about 39.83% of global consumption. Raw materials of polypropylene are mainly crude oil and coal. All over the world, polypropylene manufacturers include LyondellBasell, SABIC, Braskem, Total, ExxonMobil, JPP, Prime Polymer, Reliance Industries, Formosa Plastics, Sinopec, CNPC and Shenhua. Those companies all have oil or coal business (mainly in China). Global production regions are mainly concentrated in North America, Europe, Asia and Middle East. In 2015, Asia polypropylene production took about 49.71%, with a global leading position. Polypropylene production in Europe was 10199 K MT, with a share of 16.52%. North America and Middle East separately took 13.20% and 11.38% in 2015. Currently, there are many technologies for producing polypropylene, such as Spheripol and Adipol technologies from Basell and Unipol Process of Dow Chemicals. Manufacturers in China mainly introduced technology from others. Also, China high quality and high value-added products still need to be imported. Self-developed technology in China needs to be improved.

The global Polypropylene market is valued at xx million US\$ in 2017 and will reach xx
