The Animal Healthcare market is primarily driven by the increasing awareness about animal health and well-being, coupled with the rising prevalence of various animal diseases. Pet ownership has grown, leading to higher demand for veterinary services and products. Additionally, the growth of the livestock industry to meet global food demand further boosts the need for animal healthcare products. Advances in veterinary medicine and technology are also driving market growth, enabling better diagnosis, treatment, and preventive care for animals. However, challenges include regulatory complexities and the high cost of certain treatments, which can hinder accessibility for some pet owners or farmers. Striking a balance between quality care and affordability is crucial for the sustainable growth of the animal healthcare market.
