## Abstracts

Potassium Metabisulfite, also called potassium pyrosulfite, is a white to faintly yellowish crystalline powder with a pungent sulfur odour. The main use for the chemical is as an antioxidant or chemical sterilant.

It is a disulfite and is chemically very similar to sodium metabisulfite, with which it is sometimes used interchangeably. It is better than sodium metabisulfite because it does not add sodium to one's diet.

In the world wide, Most of manufactures mainly distribute in Europe India and China. Europe has a long history and unshakable status in this industry, like BASF and Essenco, both have perfect products. As to India, the number of the Potassium Metabisulfite players is far more than other areas.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Potassium Metabisulfite 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Potassium Metabisulfite 3900 industry.

Based on our recent survey, we have several different scenarios about the Potassium
