Abstracts

This report studies the global Potassium Phosphite market status and forecast, categorizes the global Potassium Phosphite market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Potassium Phosphite is obtained by the neutralization of phosphonic acid and an alkali salt; typically potassium hydroxide (KOH). It is the active ingredient in Alude, Magellan, Vital, Vital Sign, Resyst, and other phosphonate fungicides. Potassium phosphite is also the main ingredient in several phosphite fertilizer products, including K-Phite, Ele-Max Foliar Phosphite, and Nutri Phite P + K.

Firstly, the potassium phosphite industry concentration is high; there are few manufacturers in the world, and high-end grade products are mainly produced in America and Europe.

In the world wide, giant manufactures mainly distribute in American and Europe. Europe has a long history in potassium phosphite industry and it's still in unshakable status currently. Van Iperen has become a global leader. In American, the mainly company is PHOENIX ENVIRONMENTAL CARE, Luxembourg-Pamol and Plant Food Company. In China, the manufactures focus in Jiangsu province.

Secondly, North America and Europe are both the major production region and major consumption region.

Thirdly, potassium phosphite is a kind of high-end fertilizer. The cost value is high and there is no large-scale application. Companies can seize their market by improving production technology and reducing production costs.

Fourthly, large companies dominate the high-end market. As the technology level in domestic is low, China has to import from others.

Fifthly, with the improvement of people's fertilizer requirement, potassium phosphite

usage amount will enhance greatly.

The global Potassium Phosphite market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
