Abstracts

Caramel color, also known as caramel, commonly known as sauce color, English Caramel, caramel is a natural colorant widely used in food, is an important member of food additives.

Powdered caramel color is a dark brown solid with a special sweet aroma and a pleasant bitterness. Soluble in water, insoluble in common organic solvents and greases.

On the downstream demand side, with the recovery of the US economy, the consumption of the food industry and feed industry continues to grow. The Mid-Atlantic region, the southern United States, and the traditional food processing region of the Great Lakes region, which are the main producing areas, will be the main growth points. However, the overall US market is relatively stable, so the overall consumption trend will not change much.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Powder Caramel Color 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Powder Caramel
