Abstracts

Soil release polymers (SRPs) are additives components of washing detergents for synthetic fibres, as they are effective in removing stains from the fabric surface and in preventing re-deposition of the stain during a wash cycle.

According to QYResearch's new survey, global Powder Soil Release Polymer market is projected to reach US\$ 283.5 million in 2029, increasing from US\$ 225.7 million in 2022, with the CAGR of 3.3% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Powder Soil Release Polymer market research.

Chemical is an important driver of this industry. Emerging economies, particularly in Asia and Latin America, are experiencing rapid industrialization, urbanization, and population growth. This drives the demand for bulk chemicals across various sectors, including construction, automotive, electronics, agriculture, and consumer goods. The rising middle class in these regions is also contributing to increased consumption of chemical products.
