## Abstracts

This report studies the global Powertrain Testing market status and forecast, categorizes the global Powertrain Testing market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Powertrain Testing is undergoing radical change, driven by the challenges that global society faces today. The need for reduced dependence on fossil fuels and improved carbon footprints is driving advances in the technologies used in all vehicles. This in turn has a direct impact on approaches to testing of powertrain components and systems.

There are three major areas of powertrain test: Hardware-in-the-loop and Component cells test sub-systems of the Powertrain and normally include simulation of other components that are absent from the test. These are generally focused on the development of hardware systems such as engine/prime-mover/transmission control systems.

Full-Powertrain cells provide a test of the full Powertrain solution, often in combination with a Robot Driver and real-world simulation tools.

In-Vehicle tests allow the full powertrain to be tested in the vehicle, normally with a Robot Driver and again will often use real-world simulation technologies.

Due to the policy promotion and fast developing automotive market, Powertrain testing became much more famous for the automotive and components manufacturers.

Demand from the downstream brings a power to the development of Powertrain Testing industry.

Powertrain testing can be divided into four types, Engine Test, Gearbox Test, Turbocharger Test and Powertrain final test. And there are generally two mainly applications of the Powertrain Testing, automotive powertrain components manufactures and Automotive Manufacturers.

There are many companies in the powertrain testing industry to offer testing service. And because of these giant multinational players in the market, the concentration of global Powertrain Testing market is relative high. The leading five companies occupy about 26% market share. They are AKKA Technologies, Ricardo, FEV, ThyssenKrupp and Horiba.

The global Powertrain Testing market is valued at 2880 million US\$ in 2017 and will reach 3890 million US\$ by the end of 2025, growing at a CAGR of 3.9% during 2018-2025.
