This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Refrigerant Compressors are driven fluid machines enhance a high-pressure gas from low-pressure gas. It is the heart of the refrigeration system. It sucked in from the suction pipe temperature low-pressure refrigerant gas, through motor driven piston compressor to exhaust high temperature and pressure refrigerant gas to provide power for the refrigeration cycle, in order to achieve compression ? condensation (exothermic) ? expansion ? evaporation (heat absorption) of the refrigeration cycle.

Refrigerant Compressors industry concentration is very fragmented, manufacturers are mostly in the Asia Pacific and Europe. As for the sales market, China output accounted for more than 54.50% of the total output of global Refrigerant Compressors market in 2016. GMCC is the world leading manufacturer in global Refrigerant Compressors market with the market share of 15.64%, in terms of sales revenue, followed by Landa, Highly, Embraco and Panasonic.

With the increasing in production capacity, expected that the Refrigerant Compressors raw material price will be stable in the short term. However, the improvement of energy, transportation costs, and labor costs, will play a significant role in promoting the cost of Refrigerant Compressors.

The average price of Refrigerant Compressors will fall further. The product average price declined in the past few years due to the technology development, the average price will keep this trend in the few future years due to increasing mature manufacturing technology and cost of raw materials.

The global Refrigerant Compressors market is valued at 11900 million US\$ in 2017 and will reach 12600 million US\$ by the end of 2025, growing at a CAGR of 0.8% during 2018-2025.
