Abstracts

RF Mixer is a non linear component that is used to up-convert or down-convert the frequency of an input signal. RF Mixers mix the frequency of an input signal (RF) with that of a Local Oscillator (LO) to produce two new signals at the sum $RF + LO$ and difference $RF - LO$ of the original frequencies.

At present, in the foreign industrial developed countries the RF Mixer industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in USA. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, the technical level is in a leading position. But foreign companies' manufacturing cost is relatively high, compared with Chinese companies, the manufacturing cost has competitive disadvantage, as the Chinese RF Mixer production technology continues to improve, their share in the international market is increasing, competitiveness in the international market gradually increase .

China's RF Mixer industry has developed into a national industry with certain research and production capacity, industry product mix has gradually improved, currently China has become international RF Mixer large consumption country, but the production technology is relatively laggard, it can only produce some low-end product, although the new production lines is increasing, the high-end product is still relying on import.

Currently the global top three external sale manufacturers are: Mini-Circuits, Qorvo Inc, Linear their production market share is over 30%, although recent years a batch of new projects are put into production, in short future, the competition pattern will not change.

With the rapid growth of the national economy as well as the rapid development of downstream industries, consumer electronics product keep stable growth in china, the telecom infrastructure is also growing in the downturn global economy situation. Chinese RF Mixer market demand is exuberant, which provide a good opportunity for the development of RF Mixer market and technology.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field.

Although RF Mixer brings a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
