## Abstracts

Rivaroxaban is an oral anticoagulant invented and manufactured by Bayer; in a number of countries it is marketed as Xarelto. In the United States, it is marketed by Janssen Pharmaceutica. It is the first available orally active direct factor Xa inhibitor.

Rivaroxaban is well absorbed from the gut and maximum inhibition of factor Xa occurs four hours after a dose. The effects last approximately 8–12 hours, but factor Xa activity does not return to normal within 24 hours so once-daily dosing is possible.

The global average price of Rivaroxaban is in the decreasing trend, from 5.62 USD/Unit in 2011 to 5.34 USD/Unit in 2015. With the situation of global economy, prices will be in slowly decreasing trend in the following five years.
