Entertainment RA with Cameras is a type of robotic arm with camera used for entertainment.

Entertainment RA with cameras, a type of kinescope, is included 6 axis, 7 axis, other entertainment RA with cameras in the report. The entertainment RA with cameras is mainly used for nail care of Broadcast Automation, Staging (live stage), Sports, Film & TVCM, Others.

The global average price of entertainment RA with cameras is in the increasing trend in 2011-2016, from about 8977 \$/Unit in 2011 to 8788 \$/Unit in 2016. As the technical goods, the price will be in declining trend while the price of the raw material (e.g. Steel) will be reduced.

Europe is the biggest market for entertainment RA with cameras, and produced about 19.9 kilo units (more than half of the global total) of entertainment RA with cameras in 2015. USA, Germany, China, France and Canada are other key producers of the product, the five took up about 70% of the market.

And Europe is the largest sales market of entertainment RA with cameras in the world in the past few years and it will keep the same position in the next years. European sales volume took up about 41% the global market in 2015. And Europe is the largest exporter of entertainment RA with cameras in the world at present. North America is the second largest market in the report with a consumption share of 18% in 2015. Other key markets are China, Japan, etc.

Currently, Ross, AR+, MR Motion Control, Camerobot, PhotoRobot, Electric Friends, Dongxu Robotics and Hanson Creative are the key players in the global entertainment RA with cameras market, and the 8 players took up about 60% of the global market in 2015. Dongxu Robotics and Hanson Creative are two of the top brands in China.

Although sales of entertainment RA with cameras brought a lot of opportunity, the study group recommends that the new entrants do not enter into the entertainment RA with

cameras field if you just have money but no technical advantage, brand advantage or downstream support.
