Rodenticides are pesticides that kill rodents. Rodents include not only rats and mice, but also squirrels, woodchucks, chipmunks, porcupines, nutria, and beavers. Although rodents play important roles in nature, they may sometimes require control. They can damage crops, violate housing codes, transmit disease, and in some cases cause ecological damage.

The Rodenticides industry is not highly concentrated, there are more than one hundred manufacturers (production 100 MT grade) in the world, and high-end products mainly come from Asia and South America.
