Roots Blower is a positive displacement lobe pump which operates by pumping a fluid with a pair of meshing lobes not unlike a set of stretched gears. Fluid is trapped in pockets surrounding the lobes and carried from the intake side to the exhaust. It is frequently used as a supercharger in engines, where it is driven directly from the engine's crankshaft via a belt or, in a two-stroke diesel engine, by spur gears.

As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Roots Blower industry in short supply on the market in the past few years, more and more companies entered into Roots Blower industry, the current demand for Roots Blower product is relatively low, lack of demand, excess supply. Ordinary Roots Blower products on the market do not sell well. The signal of market price change indicates the trend in the Roots Blower industry, low-end product has excess capacity and high-end product is in short supply.

Roots Blower product demand market also has a certain space, but basically showing the scarcity of high-end products, excess capacity of low-end products, there is a large market demand for high-end products to seize market share, local enterprises export more low-end products.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area; there will be more new investment to enter the field.

Along with the development of Chinese domestic Roots Blower, the performance distance has been shortened compared with the imported Roots Blower.

As large demand of high-end products at home and abroad, many companies began to enter the field of high-end. Currently, the Chinese Roots Blower industry has not only begin to transit to high-end Roots Blower products, while still extend in the resource-rich land and downstream industry chain.

Although sales of Roots Blower brought a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and downstream support do not enter into the Roots Blower field.

The global Roots Blower market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
