This report studies the global Rotary Switches market status and forecast, categorizes the global Rotary Switches market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A rotary switch is a switch that is operated by turning rather than flipping or pushing. The switches were common in devices that needed to provide a wide array of options rather than the two or three provided by the other switch types. A rotary switch consists of a single pin, called a rotor, which has one or more flat wheels connected to it, called decks. When a user turns a knob, the rotor turns the decks and changes the way they connect to the device. This creates a wide array of different possible settings.

Grayhill, C&K Components, Apem, and EAO captured the top four revenue share spots in the Rotary Switch market in 2015. Grayhill dominated with 18.17 percent revenue share, followed by C&K Components with 8.2 percent revenue share and Apem with 8.37 percent revenue share.

In the future, the global consumption of Rotary Switch will show upward tendency further, consumption is expected in 2020 will be 213.157 (M units).

Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost are two major problems.

Although sales of Rotary Switch brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend taking risk the enter this market.

The global Rotary Switches market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
