There are two major types of safety syringes available in the market, namely, retractable safety syringes and non-retractable safety syringes. Retractable safety syringes can be further categorized as the automatic retractable safety syringes and manual retractable safety syringes. Sheathing tube syringes equipped with sliding needle covers and hinged needle covers are the examples of non-retractable safety syringes.

The average price of Safety Syringes is in the decreasing trend, from 579 USD/K Unit in 2011 to 443 USD/K Unit in 2015. With the situation of global economy, prices will be in decreasing trend in the following five years.

The classification of Safety Syringes includes Retractable, Non Retractable and others. The proportion of Non-Retractable Safety Syringes, in 2015 is about 55.74%, and the proportion of Retractable Safety Syringes in 2015 is about 44.26%.

Market competition is intense. The revenue proportion of top 3 is 61% in 2015. BD, Medtronic, Smiths Medical, etc. are the leaders of the industry, and they hold key technologies and patents, with high-end customers; have been formed in the monopoly position in the industry.
