A storage area network (SAN) switch is a device that connects servers and shared pools of storage devices and is dedicated to moving storage traffic. The SAN switch contains the Director-class switches and Fibre Channel switches.

Beginning in the late 1990s, FC emerged and widely adopted by the world's leading server and storage systems manufacturers and is now available in 2, 4, 8 and 16 gigabit per second (Gb/s) FC solutions. Its advanced capabilities enabled new architectures such as SAN which connect multiple host computers to one or more storage arrays. One of the key drivers of growth in the SAN market is the "greenfield" deployments in emerging markets, such as BRICS countries, with more pronounced growth mainly in China and India. Government and financial institutions in these regions are also significant contributors to the SAN market's growth.

The global SAN Switches market is valued at 1900 million US\$ in 2017 and will reach 1620 million US\$ by the end of 2025, growing at a CAGR of -2.0% during 2018-2025. The major players covered in this report
