The consumption volume of sanitary protection machine is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of sanitary protection machine industry may not keep that fast. But it is surely forecasted that the market of sanitary protection machine is still promising.

The product average price declined in the past few years due to the technology development, the average price will keep the trend in the few future years due to increasing mature manufacturing technology and lowering cost of raw materials.

The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer.
