Abstracts

Saturated polyester resin refers to a group of polymers derived from the condensation of polyol and an acid generally. Different types and characteristics of saturated polyester resins can be synthesized by different multi-acid and polyol. It is a synthetic material that does not contain unsaturated bonds except benzene ring.

Saturated polyester resin production is mainly concentrated in China, Europe USA and Japan at present, the output of the four regions occupies more than 80% of global saturated polyester resin production in 2014.

The market of saturated polyester resin is decentralized, there too many companies to produce this product, and the global leading players (top ten: Allnex, DSM, Evonik, Hitachi Chem, Stepan, NIPPON GOHSEI, Hexion, Arkema, and Sino-French Ind, Shenjian New Material from China) only takes up about 46% of total market in 2014.

In 2014, the global production of the saturated polyester resin reaches over 1000 K MT; the CAGR is about 5.86% during 2010 to 2015.

China is now the largest consumption regions in saturated polyester resin market, there are also a lot of companies to manufacture the saturated polyester resin, top ten in sales is about 70% of the Chinese market. The CAGR in China is about 7.47% during 2010 to 2015, which shows that Chinese market increased faster than the global market.

Although sales of saturated polyester resin brought some opportunities, the study group recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the Saturated Polyester Resin field hastily. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Saturated Polyester Resin 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Saturated Polyester Resin 3900 industry.

Based on our recent survey, we have several different scenarios about the Saturated Polyester Resin 3900 YoY growth rate for 2020. The probable scenario is expected to grow by a xx% in 2020 and the revenue will be xx in 2020 from US\$ 3048.6 million in 2019. The market size of Saturated Polyester Resin 3900 will reach xx in 2026, with a CAGR of xx% from 2020 to 2026.
