This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Saw Palmetto Extracts is an extract of the fruit of *Serenoa repens*. Saw palmetto (*Serenoa repens*) grows wild in Florida and other parts of the southeastern United States; the berries have been harvested and used for prostate support for almost 140 years.

Saw palmetto extract is an extract of the fruit of *Serenoa repens*. Saw palmetto (*Serenoa repens*) grows wild in Florida and other parts of the southeastern United States; the berries have been harvested and used for prostate support for almost 140 years. USA is the sole origin of saw palmetto extract raw material. Market insiders think that saw palmetto berries from others regions are not the authentic raw materials.

Saw palmetto extracts have two types, including liquid type and powder type. Powder type is usually produced from the liquid type. The purity of liquid type ranges from 80%-95% while the key purity of powder type ranges from 25% to 45%. According to the research, although there are many manufacturers in China producing powder type, only a few of them can provide the liquid type to the market, as they still have to depend on import to cater demand.

The global Saw Palmetto Extracts market is valued at 130 million US\$ in 2017 and will reach 130 million US\$ by the end of 2025, growing at a CAGR of 0.6% during 2018-2025.
