## Abstracts

Sclerotherapy is a procedure used to treat blood vessels or blood vessel malformations (vascular malformations) and also those of the lymphatic system. A medicine is injected into the vessels, which makes them shrink. It is used for children and young adults with vascular or lymphatic malformations. In adults, sclerotherapy is often used to treat spider veins, smaller varicose veins, and hemorrhoids.

Now more respected hospital minimally invasive surgical procedure, Sclerotherapy Treatment is relatively old. And there is a lot of shortcomings hardener.
