## Abstracts

This report studies the global Scoop Stretcher market status and forecast, categorizes the global Scoop Stretcher market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

The scoop stretcher (or clamshell, Roberson orthopedic stretcher, or just scoop) is a device used specifically for moving injured people. It is most frequently used to lift people who may have a spinal cord injury from the ground, either due to unconsciousness or in order to maintain stability in the case of trauma.

A scoop stretcher has a structure that can be split vertically into two parts, with shaped 'blades' towards the center which can be brought together underneath a patient. The two halves are placed separately either side of the patient, or then brought together until securing clips at the top and bottom both engage.

Scoop stretchers reduce the chance of undesirable movement of injured areas during Sports of a trauma patient, as they maintain the patient in a supine alignment during Sports to a stretcher, vacuum mattress or long spine board). They are more comfortable than a long spine board for Others

The scoop stretcher can be used for patient Others, provided the patient is strapped. However, the ninth edition of the ATLS Student Course Manual advises against using scoop stretchers for patient Others. For comfort and safety reasons, it is recommended to Sports the patient to a vacuum mattress instead, in which case the scoop stretcher is put on the Others device and then opened.

The Scoop Stretcher market has been experiencing continuous growth and will maintain the same trend in the coming years. This growth in the market has been attributed to the rising average lifespan, ranging from 7 to 10 years, of these stretchers and the presence of refurbished equipment. In addition, the rise in demand for stretchers that

are technically advanced, increasing surgical procedures, and the rising occurrence of chronic diseases are the prime factors predicted to stimulate the growth of the market. Furthermore, the increasing global geriatric population is also an important factor fuelling the demand for Scoop Stretcher owing to elderly people being more prone to numerous disorders that require hospital care. In the report, the Scoop Stretcher market is segmented on the basis of product types, applications, technology, and geography.

Geographically, the Europe region is the largest market in the world, owing to presence of large number of manufacturers, increasing population with chronic diseases and world-class medical infrastructure. Asia-Pacific region is considered as the most promising markets in the forecast period 2013 to 2019. Rapid evolution of medical tourism industry in countries (such as India, Thailand, Singapore and others) and rising geriatric population which are more prone to diseases are some of the key reasons accentuating the growth of this market. Moreover, presence of large population base which consequently gives rise to patient population, rapid development of medical infrastructure, large number of natural and man-made disasters and increased healthcare awareness are other factors that are indirectly increasing the demand for Scoop Stretcher in the Asia-Pacific region.

The global Scoop Stretcher market is valued at 260 million US\$ in 2017 and will reach 310 million US\$ by the end of 2025, growing at a CAGR of 2.6% during 2018-2025.
