This report studies the global Screw Fasteners market status and forecast, categorizes the global Screw Fasteners market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A screw is a type of fastener, typically made of metal, and characterized by a helical ridge, known as a male thread (external thread) or just thread. A screw is an inclined plane wrapped around a nail. Some screw threads are designed to mate with a complementary thread, known as a female thread (internal thread), often in the form of a nut or an object that has the internal thread formed into it. Other screw threads are designed to cut a helical groove in a softer material as the screw is inserted. A screw will usually have a head on one end that contains a specially formed shape that allows it to be turned, or driven, with a tool.

Market competition is intense. With the development of society and the changing of consumer demand, the Screw Fasteners industry will be more and more popular in the future.

The global Screw Fasteners market is valued at 44400 million US\$ in 2017 and will reach 55800 million US\$ by the end of 2025, growing at a CAGR of 3.3% during 2018-2025.
