This report studies the global Ship Radar market status and forecast, categorizes the global Ship Radar market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Radar is an acronym for 'radio detection and ranging.' Ship radars are X band or S band radars to provide bearing and distance of ships and land targets in vicinity from own ship (radar scanner) for collision avoidance and navigation at sea. Ship radar is a vital component for safety at sea and near the shore.

The market for Ship Radar is fragmented with players such as Furuno, Navico, JRC (Alphatron Marine), Garmin, SAM Electronics and so on. Top 4 companies occupy 65% market share in 2016. Japan owns major production and biggest export market in the world. Market stays in mature period with a clear concentration. There hardly to have obvious technology breakthrough except deeper system function integration.

With Continuous rise in demand for global marine transportation vessel manufacturing and global military naval power requirement from eastern pacific and North America, this demand could counteract the negative influence from global economic trend in some distance.

The global Ship Radar market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
