Abstracts

This report studies the global Silica Aerogel market status and forecast, categorizes the global Silica Aerogel market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Aerogel is a synthetic porous ultralight material derived from a gel, in which the liquid component of the gel has been replaced with a gas. The result is a solid with extremely low density and low thermal conductivity.

Silica aerogel is the most common type of aerogel, and the most extensively studied and used. It is silica-based, derived from silica gel. The lowest-density silica nanofoam weighs 1,000 g/m³, which is the evacuated version of the record-aerogel of 1,900 g/m³. Silica aerogels also have a high optical transmission of ~99% and a low refractive index of ~1.05.

Global silica aerogel market size was estimated at USD 230.82 million in 2016 and is likely to witness significant growth over the next seven years owing to its rising demand from various end-use industries including building insulation, oil & gas consumables, transportation, aerospace & defence materials, etc. Silica aerogel panels and blankets formed through adhesion to a variety of fibrous material in the gelation or post-synthesis will not be the only product to shape this industry over the next decade. There will be notable rises for both silica aerogel powder and granule particles as well as polymer aerogel products. The silica particles can be incorporated in a range of solid and liquid products post-synthesis, translating many of the properties from the pure form into traditional products.

The global silica aerogel industry is competitive with major companies involved in continuous product innovation and R&D activities. Key players include Aspen Aerogels

Inc., Cabot Corporation, Aerogel Technologies and several Chinese companies like Nano High-Tech and Guangdong Alison Hi-Tech. Aspen Aerogels is the global leader in this industry, with revenue of over 115.34 Million USD in 2016, namely 49.97% of the total market.

The global Silica Aerogel market is valued at 250 million US\$ in 2017 and will reach 830 million US\$ by the end of 2025, growing at a CAGR of 16.4% during 2018-2025.
