Abstracts

Single-use systems (SUS) refers to biopharmaceutical manufacturing (bioprocessing) equipment designed to be used once (or for a single manufacturing campaign) and then discarded. Generally, SUS equipment is composed primarily of plastic components that have been sealed and sterilized using gamma irradiation. Single-use bioprocess bags provide a streamlined way to enhance your manufacturing productivity. By offering strength, durability, and temperature resistance, a single use bioprocess bag has the durability to withstand human and machine handling via specialized pharmaceutical equipment.

According to QYResearch's new survey, global Single-use Bioprocessing Bag market is projected to reach US\$ 6297.1 million in 2029, increasing from US\$ 3125 million in 2022, with the CAGR of 10.2% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Single-use Bioprocessing Bag market research.

The life science research and related industries in developed countries in Europe and America have a development history of over 100 years, so the main market demand for disposable plastic consumables in global biological laboratories is mainly in Europe and America. In the Asia Pacific region, especially countries represented by China, India, and Singapore, with the continuous growth of new investment in the biotechnology industry, the market for disposable plastic consumables in biological laboratories is growing rapidly and has enormous potential. From the perspective of market supply, internationally renowned comprehensive service providers of biological laboratory supplies are mainly concentrated in developed countries in Europe and America such as the United States and Germany. Multinational companies represented by Corning,

Thermo Fisher, VWR, GE Healthcare, Merck KGaA, Sarstedt, and Eppendorf have long dominated the global supply of disposable plastic consumables for biological laboratories with their strong R&D and brand advantages.
