Abstracts

This report studies the global Single Vision Lenses market status and forecast, categorizes the global Single Vision Lenses market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Single vision lenses have just one prescription, distributing focus evenly over the entire surface of the lens. They are particularly suitable for correcting myopia (nearsightedness), hyperopia (farsightedness), astigmatism and so on.

The industry is expected to remain innovation-led, with frequent acquisitions and strategic alliances adopted as the key strategies by the players to increase their industry presence. Meanwhile, optimize product mix and further develop value-added capabilities to maximize margins.

The Asia Pacific region is estimated to be the key market over the forecast period, owing to the increasing demand. All manufactures in the world are committed to the improvement of product. These two years, some of Chinese manufactures can almost catch up with the world's leading technology too. Most technologies are developed by the manufacturers instead of importing from other companies.

The global Single Vision Lenses market is valued at 6800 million US\$ in 2017 and will reach 6850 million US\$ by the end of 2025, growing at a CAGR of 0.1% during 2018-2025.
